

Submission Checklist

○ Scope

Vascular Biology is an open access, peer-reviewed journal devoted to vascular biology in disease, injury and regeneration. Published articles will reflect the multi-disciplinary nature of vascular research. The journal considers basic, translational and clinical studies.

○ Article types

Vascular Biology publishes original quality research papers and review articles.

○ Charges to authors

Vascular Biology is an Open Access publication. The Article Publication Charge (APC) will be fully sponsored by Bioscientifica until the journal is accepted into the Science Citation Index. Until this point there will be no charges to authors.*

○ Ethics

All authors must abide by the standards outlined in the journal's [ethical guidelines](#). Bioscientifica is a member of [Similarity Check](#) (powered by iThenticate). Manuscript submissions will be screened against the Similarity Check database.

○ License and copyright policy

Vascular Biology does not require authors to assign copyright of their publications. Articles will be published under the terms of the author's chosen Creative Commons licence (CC BY, CC BY-NC or CC BY-NC-ND). Authors requiring an alternative licence should contact the [editorial office](#).

○ Permissions

It is your responsibility to clear all copyright permissions for any work reproduced in your article and to pay any permissions fees.

○ Preparation of manuscripts

- Papers should not exceed ten printed pages. We recommend a maximum of 4500 words.
- Papers must be written in clear, concise UK or US English. Where English is not the author's first language, the journal requests that the paper is checked by a native English speaker before submission. A number of language editing services are available.
- Manuscripts must contain the following sections: Title page, Keywords, Abstract (maximum 250 words), Introduction, Materials and methods/Subjects and methods, Results, Discussion, Declaration of interest, Funding, Acknowledgements, References. If applicable include Figure legends, Tables and Figures.
- Use double line spacing throughout, number lines and pages.
- Cite references in the text in numerical order and list them in the order they are cited in the reference list.

○ How to submit

Authors are required to [submit online](#) through the ScholarOne Manuscripts site.

*Bioscientifica will sponsor the Article Publication Charge during the first few years of launch, after which it will be competitively priced.
